WHAT'S STANDING BETWEEN YOU AND THE NETWORK CONNECTION YOU NEED?

COLD HARD CASH

Trying to stay within budget?

NO — *Oh, you fancy, huh? Feel free to send some of that extra $ my way, Daddy Warbucks.*

YES

SQUIRRELS

Worried about your fiber being cut or chewed in half?

NO — *Well, you should be! Squirrels account for 17% of fiber line damage, and downtime costs money.*[2]

YES

SPEED

Do you have the speed you need?

YES

NO

Is it enough for your future bandwidth growth?

YES

NO

Lucky you! But beware: More than 70% of IT professionals report experiencing at least one unplanned network outage in the last 6 months,[1] *so it couldn't hurt to prepare yourself.*

WEATHER

Does it often rain more than 2" per hour where you are?

NO

YES — *Yikes! You should consider building an ark.*

SIDEWALKS

Need to get online faster than it takes to lay fiber?

YES

NO — *Get out your jackhammer and start digging!*

BAD CONNECTIONS

Do your employees complain about slowness and dropped connections?

YES

NO

Have you experienced any unplanned outages in the last 6 months?

YES

NO

Are you looking for additional bandwidth?

NO — *It must be nice living in a perfect world.*

YES

YOUR NETWORK CONNECTION SOLUTION IS:

FIXED WIRELESS

RESILIENT

Get increased capacity and improved uptime while protecting yourself from critters and costly outages. Plus, it's pretty much impervious to rain.

AFFORDABLE

With no upfront equipment or engineering costs, it's cheaper to install. And, using both fiber and wireless paths simultaneously avoids wasting idle capacity, so you aren't paying for unused bandwidth.

SCALABLE

With bandwidth speeds from 10 Mbps to 5 Gbps, Fixed Wireless grows with you.

RAPIDLY DEPLOYED

Installed and operational in as few as 45 days or less*, with no need to rip up roads and sidewalks.
