ON-DEMAND DISASTER RECOVERY AS A SERVICE

FOR ALL THE IFS THAT BECOME WHENS

While increasingly top of mind for many organizations, a fully replicated DR environment can be a tough expense to justify depending on the recovery objectives of your company. INAP's On-Demand Disaster Recovery as a Service (DRaaS) is an entry level, pay-as-you-go solution. Pricing is based on the storage and licensing used while in standby; you only pay for your private cloud resources when a disaster is declared. With On-Demand DRaaS, gain protection from unexpected downtime without paying month-to-month for redundant infrastructure.

THE INAP DIFFERENCE

Secure Seeding

Our proprietary seeding system allows you to transfer large amounts of data to us with confidence—physically secured and fully encrypted.

DRaaS-Specific SLA

We crafted an SLA specifically to address the complexities of DRaaS that a generic SLA wouldn't—because we know what business continuity means for you and your applications.

Managed Failover Tests

Testing your DR environment annually ensures everything is working in case of an emergency. INAP engineers join your team to test the recovery process according to the runbook.

White Glove Service and Onboarding

Exceptional service from the beginning. White glove onboarding ensures both you and your INAP support team have a defined set of procedures in case of a recovery event.

PRODUCT FEATURES

PAY AS YOU GO

Server resources are billed on demand when the environment is activated. Only data and licenses are charged month to month.

SECURE DATA CENTERS

Your data is kept safe in world-class, SOC-compliant INAP data centers.

ARRAY AGNOSTIC

Replicate any VMWare or Hyper-V environment to the cloud, regardless of storage vendor or architecture.

	ON-DEMAND DISASTER RECOVERY AS A SERVICE
Software Used	Veeam or Zerto
Minimum Requirements	Storage + Licenses
Pricing Model	Monthly Fee = Storage + Licenses Pay As You Go for Server CPU/RAM on Virtual Private Cloud (VPC)
Optional Services	White Glove Onboarding Managed Failover Testing
Service First Support	Yes
Free DART Box Seeding	Yes

ABOUT INAP

We are a leading global provider of high-performance data center and managed cloud solutions. Through our portfolio of high-density colocation, managed cloud hosting and powerful network solutions, we partner with customers to create secure and scalable IT infrastructure solutions designed for today and for the future.
