RCN BUSINESS

MANAGED SECURITY

Standard Firewall

A business network must be protected against potential cyber and Internet security threats. However, managing and monitoring network security can be a costly and somewhat overwhelming task for most enterprise IT organizations.

RCN Business Managed Security—Standard Firewall is a fully managed cloud-based service designed to help businesses manage and monitor their information security.

MANAGED SECURITY—STANDARD FIREWALL PROVIDES:

Stateful Firewall

- Configures and deploys a Layer 3 and Layer 4 stateful firewall
- Includes configurable objects such as addresses, zones and schedules, as well as access policies such as matching and actions

DDoS

- Provides a distributed implementation for protection against distributed denial of service (DDoS) attacks, including zone and end DDoS protection
- Recognizes and protects against floods, spoofing techniques, scans and packet anomaly detections for Layer 3 and Layer 4
- Includes DDoS mitigation techniques such as Alert, Random Early Drop, and Drop and SyncCookie measures
- Provides a detailed log sent to analytics

Application Visibility

- Identifies over 2600 specific applications
- Applies a range of network and security policies to application traffic flows
- Includes per application security policy, company policy enforcement and context-based application policies

BENEFITS

FULLY MANAGED SERVICE

- Minimal IT support required
- Automatic software upgrades
- Eliminates the complexity of product interoperability issues

NO CAPITAL EXPENDITURE

- Cloud-based service
- Subscription-based billing

REAL TIME CONTROL AND MONITORING

- Eliminates multiple vendors' screens and support centers
- Proactive monitoring and changes by a dedicated and highly trained security team

ONE PROVIDER FOR ALL NETWORK NEEDS

- RCN Business provides the connectivity and the security for your business network
