Protect against DDoS attacks

DDoS attacks are constant, costly, debilitating and an increasingly pervasive threat. The Windstream Enterprise DDoS Mitigation Service offers a comprehensive, cost-effective solution.

THE PROBLEM

DDoS attacks disrupt business

A malicious third-party targets a company with a DDoS attack, looking to take down a network, system or Internet-based application service to inflict damage and business losses.

1. An ATTACK directs large amounts of traffic toward a network.

2. The network is DISRUPTED — partially or completely.

3. The potential result is LOSS OF DATA, critical assets and reputation.

THE LANDSCAPE

DDoS attacks are rising

DDoS attacks are growing in frequency, size and severity.

124,000
average DDoS attacks per week

1Gbps
average attack size

579 Gbps
largest attack detected

THE SOLUTION

Secure your network, protect your business

Our DDoS Mitigation Service is an affordable solution that pro-actively monitors, detects, validates and mitigates attacks, therefore minimizing downtime. And it's backed by 24/7 support from our expert team.

The Windstream Enterprise DDoS Mitigation Service Advantage:

Minimizes Downtime
Proactive monitoring with 15 min SLAs for escalation and mitigation

Flexible
Mitigation of layer 3, 4 & 7 DDoS attacks

Cost-effective
Monthly fee covers monitoring and mitigation, regardless of number or scale of attack

Rapid Response
Reduce response time to minutes with proactive mitigation and seconds with automated mitigation

Visibility & Awareness
Access to our DDoS Portal for real-time metrics and reports

Network Agnostic
Protects both Windstream Enterprise and third-party networks

Get powerful, affordable protection from DDoS attacks
